# Outdoor Space with style

# Designed to Last

**Whiteriver Composite Decking** was developed to meet the exceptional high standard required for outdoor living today. The Irish climate can be harsh on traditional wood decks and it is a constant struggle for owners to maintain and treat decking each year.

**Whiteriver Composite Decking** products are made using HDPE and wood, creating a revolutionary composite of improved, user-friendly material that outperforms other traditional pure wooden and plastic materials.

**Whiteriver Composite Decking** is ideal for the construction of domestic & commercial decks, board walks, marinas, pool sides and other landscaping applications. It is environmentally friendly and is 100% recycleable, perfect for the forward thinking architect or local authority planner. Composite decking is extremely durable, entirely splinter free and it has a pleasant and natural feel to the surface. Whiteriver composite decking is as easy to work with as wood and can be drilled, sawn and milled.

**Whiteriver Composite Decking** is available in solid and hollow profiles; both are reversible to give you a choice of surface finish. There are three different colours available: Fired Earth, Anthrazit & Soft Grey.

**Whiteriver Composite Decking** is easy to maintain and can be cleaned using clean soapy water or a high pressure cleaner (maximum 80 bars). This will keep your deck looking good.

**One of the main benefits of composite decking is that there is no need for any annual treatment or oiling.**

## IDEAL FOR:

- Garden Decks
- Commercial Decks
- Marinas
- Board Walks
- Commercial Decks
- Stairs
- Hotels
- Swimming Pools

## SLIP RESISTANCE

Whiteriver Composite decking has been tested for slip resistance in accordance with BS 7976 Part 2, 2002 and UK Group Guidelines (UKSRG - Issue3, 2005), and has been found to have an extremely low risk of slip under dry condition and a low risk of slip under wet conditions.

## WHY COMPOSITE?

Composite Decking is for the home-owner who wants a decking product with a natural look, uniform colouration and will not need any annual treatment like conventional wood decks. Composite Decking is low maintenance and has a long lifespan, which saves time and money, now and in the future.

<b>Manufactured From:</b>	<b>60% Wood</b>	<b>30% Recycled HDPE</b>	<b>10% Additives / Pigments</b>
---------------------------	-----------------	--------------------------	---------------------------------

10 Year Limited Warranty against rotting, cracking, structural damage from fungal decay when our products are applied in accordance with our manufacturers instructions and is limited solely to the replacement of boards. The manufacturer and its distributors may not be held liable for damage caused by faulty installation of material. Please read the fitting & maintenance instructions carefully.
